# AI FOR BEGINNERS

**Module 15: Capstone Project**

---

**Introduction to Capstone Project**

The Capstone Project is the final and most important part of this course. It allows learners to apply all the concepts they have learned—from understanding AI basics to using tools and prompt engineering—in a practical, real-world scenario. Instead of just learning theory, this project focuses on creating something tangible using AI.

The goal is to build confidence in using AI tools independently and demonstrate practical skills that can be applied in business, education, or personal projects.

Simple understanding:
**Capstone = Apply what you learned**

---

# 5 Basic Phases of Project Management

## 1 Initiation

- Define project goals
- Create a business case
- Complete the project charter
- Draw up the list of stakeholders

## 2 Planning

- Define scope
- Create a project plan
- Set a budget baseline
- Define roles and responsibilities

## 3 Execution

- Allocate project resources
- Manage project resources
- Build the product or process
- Meet often and fix issues as they rise

## 4 Monitoring and Control

- Track effort and cost
- Monitor project progress
- Ensure adherence to plan
- Prevent any chance for disruptions

## 5 Completion

- Handover deliverables
- Review project deliverables
- Get project results approved
- Document project learnings

The project involves:

| Step | Description |
|---|---|
| Idea | Choose a project topic |
| Planning | Define goals |
| Creation | Use AI tools |
| Output | Final result |

Presentation Showcase project

---

**Project Options**

Learners can choose from multiple project types based on their interest:

1. AI-based Poster Design
2. AI Chatbot Creation
3. AI Content Creation Project
4. AI Productivity Workflow

This flexibility allows learners to explore different use cases.

---

**Project Option 1 – AI Poster Design**

Create a poster using AI tools for a business, event, or campaign.

Tools:

- Canva AI

Steps:

- Generate content using AI
- Design visuals
- Create final poster

Use case: Marketing, branding, awareness campaigns

**Project Option 2 – AI Chatbot**

Develop a simple chatbot using AI tools.

Tools:

- ChatGPT

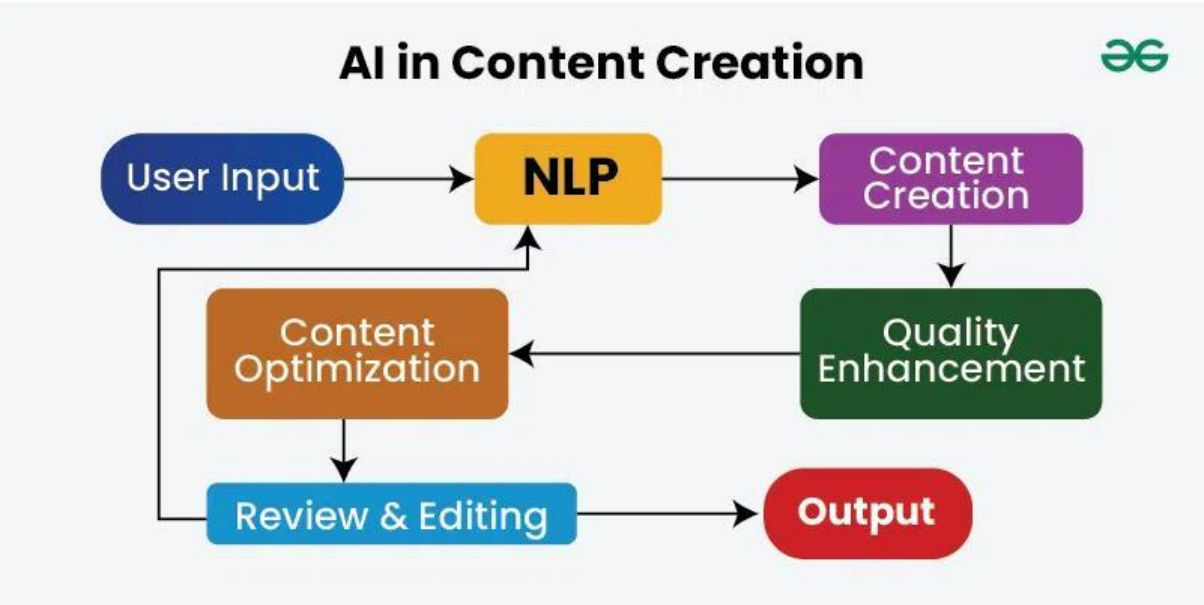
Steps:

- Define chatbot purpose
- Create prompts
- Test responses

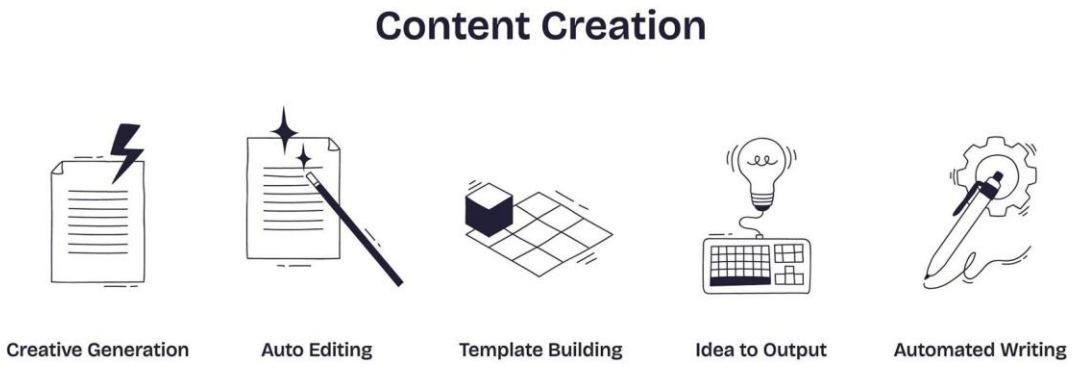
Use case: Customer support, FAQs

---

**Project Option 3 – Content Creation**



2026 AIVSME Torsecure Cyber LLP. All rights reserved.



Create a complete content piece:

- Blog + Image
- Social media post
- Video script

Tools:

- ChatGPT → Text
- Canva AI → Design

---

**Project Option 4 – Productivity System**

Build a daily productivity system using AI tools.

Tools:

- Notion AI

Steps:

- Plan tasks
- Automate workflows
- Track progress

Use case: Personal productivity, business operations

---

**Project Planning**

2026 AIVSME Torsecure Cyber LLP. All rights reserved.

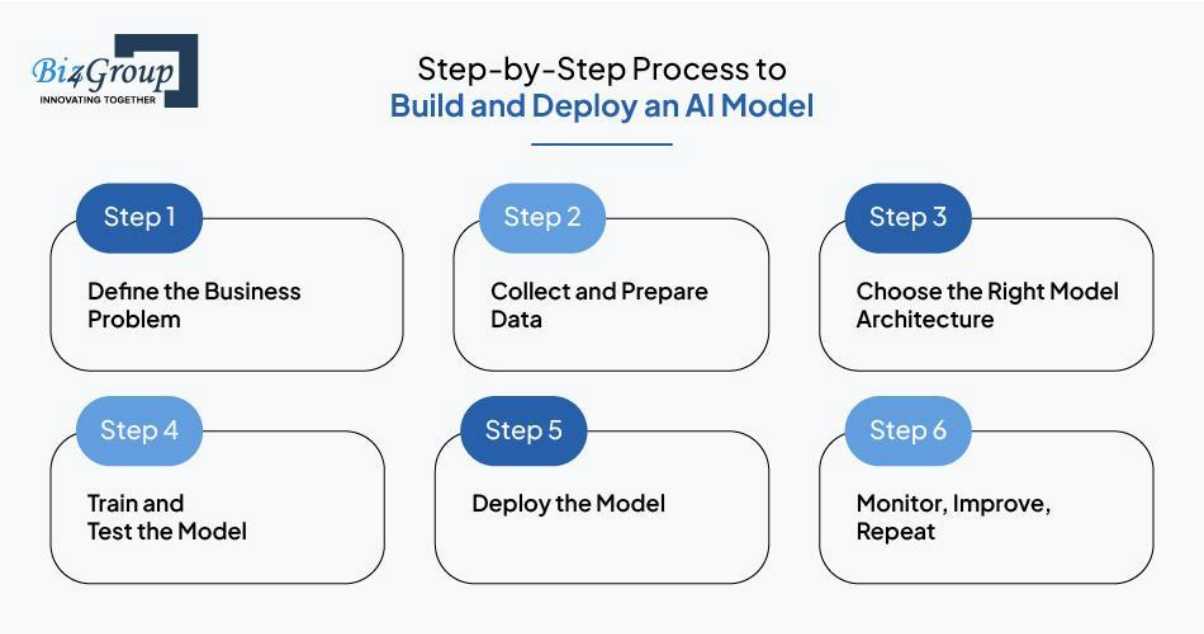
Before starting, define:

| Element | Description |
|---|---|
| Goal | What you want to achieve |
| Audience | Who it is for |
| Tools | AI tools used |
| Output | Final result |

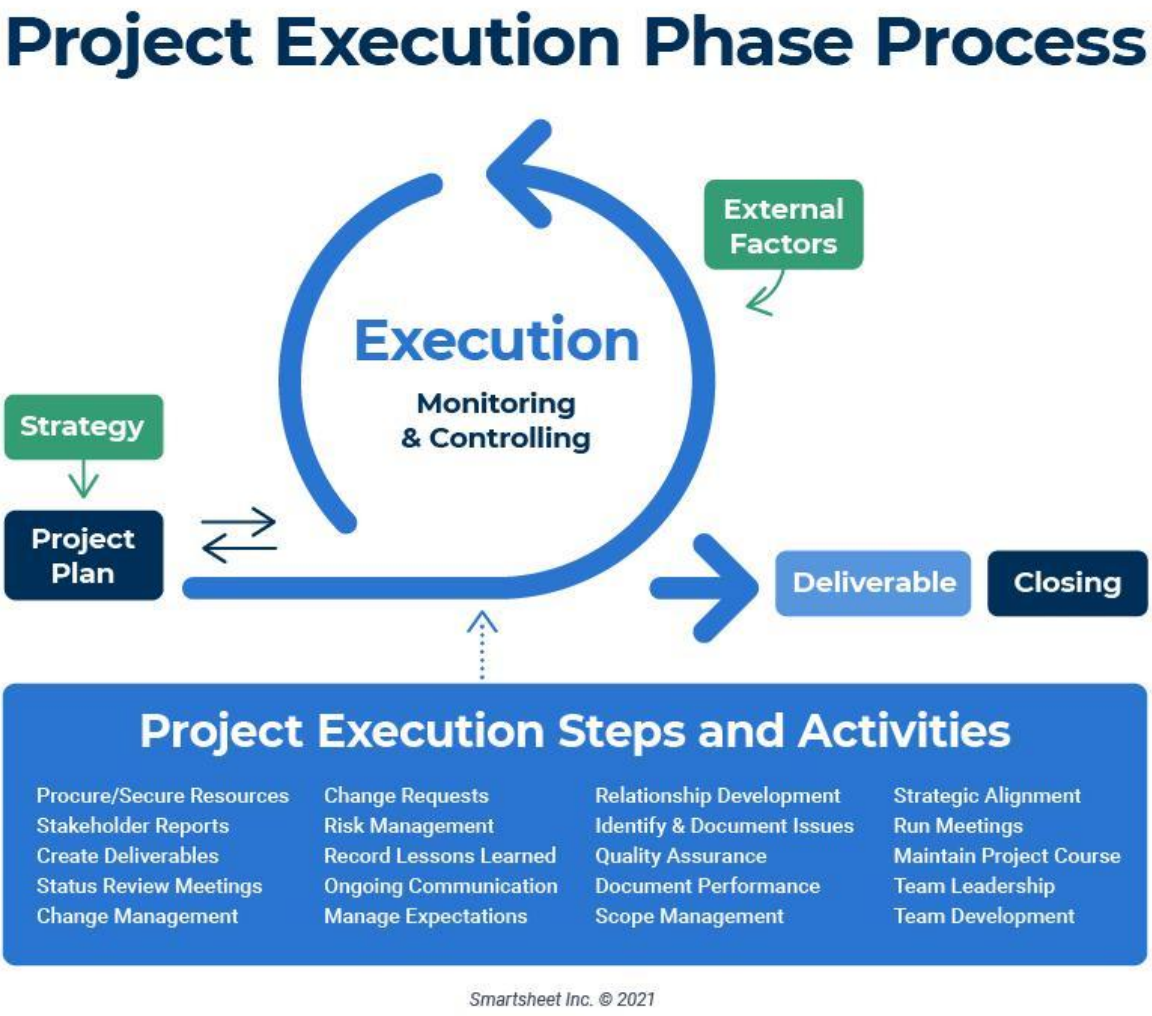
Planning ensures clarity and success.

---

**Execution Process**



2026 AIVSME Torsecure Cyber LLP. All rights reserved.



Steps:

1. Generate ideas
2. Create content/design
3. Refine output
4. Finalize project

---

**Real-World Example**

A learner creates:

- A social media post using ChatGPT
- A poster using Canva AI

Final output:
A complete marketing post ready for publishing

---

**Evaluation Criteria**

| Criteria | Description |
|---|---|
| Creativity | Original idea |
| Accuracy | Correct content |
| Design | Visual quality |
| Practical use | Real-world value |

---

**Common Mistakes**

- Poor prompt usage
- No planning
- Overdependence on AI
- Lack of editing

Avoiding these improves project quality.

---

**Best Practices**

- Use clear prompts
- Review outputs
- Combine tools
- Keep it simple and practical

---

**Final Output & Presentation**

The final project should include:

- Clear objective
- AI-generated output
- Explanation of tools used

Learners can present their work as:
